DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1-21 are rejected under 35 U.S.C. 103(a) as being unpatentable over Mombo-Caristan (US Pat. 5,603,853).

Mombo-Caristan discloses the welding of metal sheet products. The sheets are lap welded as the two sheets are unrolled from coil stock. There are upper and lower support rolls which support each sheet and are varied to accommodate different thicknesses. The spacing between the rolls is also used for applying pressure to the sheet which helps in urging the sheets in a forward direction. Preferably, the rolls are driven in order to control the motion. The upper roller and lower roller bear against the respective surfaces to maintain the sheets in a desirable position for welding and so forth. In addition the guide rollers may also be used as pressure rollers in order to planish the sheets in the overlap region. (abstract, figures 9a, b, c, col. 14, lines 36-47, col. 15, lines 10-20 & 62-67, col. 16, lines 1-25) Mombo-Caristan does not teach the use of a servomotor or the presence of a robot.

Art Unit: 1725

Mombo-Caristan discloses that the rollers are driven. It is obvious that the substitution of a driving mechanism with a servomotor, is obvious substitution of an equivalent structure. In re Kuhle 188 USPQ (CCPA 1975) and In re Ruff 118 USPQ 343 (CCPA 1958).

Mombo-Caristan does not disclose the use of a robot, however, the provision of a mechanical or automated means to replace manual activity has been held to be obvious. In re Venner 120 USPQ 192.

Response to Amendment

3. Upon carefully reviewing Applicant's arguments filed May 13, 2003 the Examiner acknowledges the addition of claims 20-21. Applicant's arguments filed May 13, 2003 (paper # 7) have been fully considered but they are moot in view of new grounds of rejection.

Conclusion

4. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO

Art Unit: 1725

MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.
